The 2nd Faculty of Medicine is the former Paediatric Faculty of Medicine, most part of clinical work takes part in the University Hospital Motol which is the biggest hospital in Czech Republic and Central Europe and the paediatric part is the most important Paediatric Hospital in Czech Republic covering all fields of paediatric care and the highest level of continuing medical education for paediatrics.

Our department is the biggest paediatric GI centre in the Czech Republic. We take care of patients with liver diseases incl. pre- and post-LTx, also of patients with IBD (incl. patients receiving biological treatment), malabsorption syndromes (celiac disease etc.), and patients with enteral and parenteral nutrition.
